

Shelters

Versatile infrastructure for defence, tech buildings and power applications.

PRODUCT AREA

SHELTERS

Tailored solutions aligned with specific requirements and customisation preferences

In today's demanding environments, the need for adaptable, reliable, and mission-ready infrastructure is paramount. W5 offers a broad range of shelter solutions designed to support critical functions across diverse applications.

From advanced infrastructure to modular defence systems, W5 shelters combine robust engineering, durability, and flexibility to ensure operational success

Defence Solutions

Adaptable defence solutions for modern operations

Tech Buildings

Advanced infrastructure for mission-critical operations

Power Solutions

Reliable operational facilities for energy-intensive process

Defence Solutions

W5's defence solutions deliver innovative, modular units designed to perform in the most challenging environments and meet the unique needs of defence forces worldwide.

Tech Buildings

Whether safeguarding sensitive data, housing essential equipment, or supporting critical energy systems, W5's tech buildings deliver unmatched adaptability and efficiency.

Power Solutions

W5 delivers engineered, tailor-made power solutions for energy-intensive applications, designed to meet specific operational and technical requirements.

Tailor-made solutions built on 40 years of experience

W5's shelters can be customised with a variety of add-ons and key features to support mission-specific needs, ensuring reliable operation in demanding environments

Available add-ons and key features include:

- Integrated power, lighting & HVAC systems.
- Signal security – EMC, TEMPEST, compromising emanations.
- Ballistic and explosive protection.
- Anti-sabotage and intrusion protection.
- Available in 10-, 20- and 40-ft ISO-standard container sizes. Custom units can be stacked and combined, creating integrated spaces of up to 2 000 m².
- Mobile command centres.
- Radar or other surveillance systems.
- Emergency power supply and battery charging systems.
- Maintenance, workshop facilities, and 3D printing.
- Accommodation, staff facilities and healthcare units.
